Lists fires (of any size) that singly utilize Monitor, Confine, or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

Northwest Fire Potential Summary:

A cold upper low pressure center that was over eastern Washington on Saturday has moved east. Interior areas will gradually clear and dry over the next few days. The west side will be slower to clear due to weak incoming weather systems from the Pacific. Drier weather is moving into the region during the week. The potential for large fires remains low through the forecast period.
